

Special Conditions relating to solicitation DAAAE20-97-R-0249

1. This solicitation is sole-source to Seiler Instruments.
2. The attachments and exhibits linked to from this document are extremely large in terms of file size. It is recommended that parties not directly involved do not download this information.
3. The linked self-extracting file ([97r0249.exe 2,652kb, 12 Jan 1998](#)) was created using PKZip compatible compression algorithms. The “de-compressed” volume represented by this attachment is 25.446 Mb of data in Adobe Acrobat 3.x Portable Document Format (PDF). By default the file will extract to the “temp” directory on the machine where the file is being uncompressed. This may be re-directed by designation in the opening screen of the decompression routine.
4. This file was compressed as a service to minimize the time necessary to download the information.
